FILBERTS—Turkish Filbert (Corylus Columna)

Guaranteed Non-Sprouting

True Tree Form

A Filbert tested for 12 years, used as a grafting or budding stock for select strains of Barcelona and other varieties. This tree is a strong and vigorous grower.

Plant this stock, have it grafted or budded to finest types of Barcelona and other standard sorts.

In the fall of 1927 we can offer a fine block of Barcelona, Du Chili, Daviana, Brixnut, Etc., budded and grafted on this non-sprouting stock.

Standard varieties of Filberts worked on this Turkish stock will make a greater and more rapid growth than those used of the old type sprouting kinds.

When using this Turkish stock, the expense of suckering and sprouting your orchard each season is saved.

AVAILABLE SUPPLY IS LIMITED. Write for detailed information concerning this non-sprouting type.

ROSES

STRONG, FIELD GROWN

TWO YEAR OLD ROSE PLANTS

Our strong field grown plants are not to be classed with the small tender hothouse plants being offered. These strong plants give far better results.

In roses there are a great many varieties, and to list these in this general list would be impractical and cumbersome, therefore those who might be interested in roses, we ask that you send for our "Special Rose List," which will give the necessary information on varieties and prices.

We will save you money on Roses
